Objective

I recently completed NQF 7 degree in Information and Communication Technology. During school years I gained experience on skills of software development with practical project we were required to develop and as IT Technician. I am computer literate and able to use Microsoft office, develop applications and have solid communication skills. I am now looking for an opportunity to enter the world of work and gain more experience.

Education

Bachelor of Information and Communication Technology (2020-2022) – Durban
(Durban University of Technology)

Matric (2018) – Sinolwazi High School (Umtata)

Skills Acquired

Web development: MERN (MongoDB Express React Node) HTML CSS JavaScript & Bootstrap

Database: MongoDB, SQL(basic)

PROJECTS

Project 1

This is my online portfolio which was created using React and Tailwind CSS. It is fully responsive with my image on the back ground of the home page. In this website you can send me an email using the **Contac** form which uses **EmailJS** to send the form straight to my gmail account or download the CV using the Download CV button. Everything about me is written in the **About** Page.

Project 2

This is a denomination of how to create an online job advertising website using React, Tailwind CSS, and a JSON data. In this website a user can filter jobs according to the experience level and there's also pagination which takes up to six cards.

When a card is clicked more details about the website is displayed with a link of the official website where a user can apply if they qualify for that particular post. One

downfall of this website is that an explore button is not working which supposedly works as a smooth scroll to the cards.

This problem can be easily solved but we uploaded the website using a free hosting account that doesn't allow updating the site. Other than that the website is working perfectly and is fully responsive.
